

American Compliance Systems, Inc.

The best way to deal with workplace accidents is to avoid them altogether. At American Compliance Systems, Inc. (ACS), we are committed to providing you with safety solutions that help manage workplace risk. We specialize in regulatory compliance, workplace assessments, and safety training for a wide variety of companies. Our goal is to help identify your company's areas of need, and address these concerns through planning, safety education, training, and documentation. Founded in 1990, with over 13 years of professional services experience, ACS offers a suite of services and products that meet the needs of businesses of all sizes, including yours.

Headquartered in suburban Philadelphia with over 1,000 active clients throughout the U.S., ACS is one of the largest safety services companies in the country. Over 95% of ACS clients renew annually -- as a result of our excellent service. Our team is comprised of highly skilled safety experts with extensive experience in the field of workplace safety. ACS is a National Safety Council (NSC) recognized Safety Training Institute. Our OSHA Authorized Instructors conduct OSHA training courses for general safety, construction safety, general industry safety, and hazardous waste operations and are certified to teach NCS first aid/CPR training programs.

Building Safe Workplaces

When workplace accidents or injuries occur, the affected person isn't the only one who suffers. Disruption in workflow means lost time and decreased productivity. With an effective risk management system in place, response to and management of accidents or incidents becomes a seamless process. A proactive approach means higher employee morale, reduced or eliminated risk of non-compliance and lower insurance rates.

With a primary emphasis in occupational health and safety, we offer everything from full service turnkey programs to unique one-time consultations designed to pinpoint and resolve areas of noncompliance in workplace safety. Best of all, ACS provides workplace risk management solutions cost effectively.

Compliance Management System (CMS)

With our turnkey CMS program, ACS becomes your outsourced occupational health and safety partner. The CMS program is designed to provide a sufficient number of onsite visits and the necessary written documentation to achieve your goals for a safe and compliant workplace within a reasonable period of time, and then to maintain that level in the years to come. Each onsite visit may include targeted safety inspections, employee training, and/or other services based on your needs and time constraints. In addition, the CMS can be customized to complement your existing safety program.

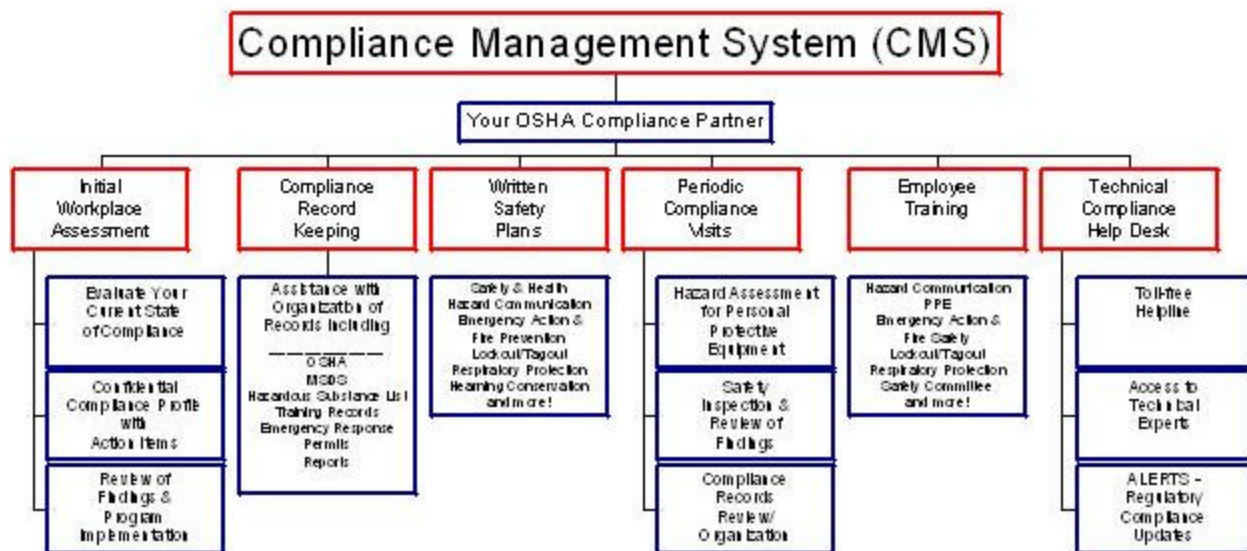

Whether you need a comprehensive safety program or assistance with your existing one, with the CMS you can build an effective program that utilizes all of our services, from employee training and written safety plans to our toll-free helpline, video lending library, and regulatory reporting. The choice is yours.

- Zoll Automated External Defibrillators

Attention: Pennsylvania Companies

The Pennsylvania Department of Labor and Industry, Division of Health and Safety implemented a special program to increase the level of safety at workplaces throughout the Commonwealth. Once you qualify under the Workplace Safety Committee Certification Program, your company is entitled to annual savings of 5% on your workers' compensation insurance. Recent legislation perpetually extends the annual discount beyond 5 years as long as you continue to meet the requirements set forth by the state.

The basic requirements for a certified workplace safety committee include: equal employer/employee representatives (min. of 2 each), monthly meetings, training committee members by a qualified instructor in safety committee operation, hazard inspection and accident investigation, and documentation of committee meetings, including agendas, minutes, and attendance records. Committees must be in operation for at least 6 full months before they can apply for certification.

American Compliance Systems, Inc. (ACS) has developed a comprehensive service, *Safety Pays*, to assist you in establishing a certified safety committee. Fill out the application, and get it approved so you can start saving money. Our *Safety Pays* program includes all or any part of the following components depending on your needs and budget:

- Safety Committee Set-Up (includes guide)
- Training (initial and annual retraining)
- Monthly Meetings
- Application for Safety Committee Certification

Our clients typical savings far exceed the fees to gain the discount, even when ACS is heavily involved.

About ACS & Our Certified Trainers

At ACS, we specialize in regulatory compliance, worksite inspections, and safety training for a wide variety of manufacturing, construction, and service companies. Our professionals are highly qualified, with hard-earned and respected credentials, and decades of front-line safety management, consulting, and training experience. Our team consists of a group of individuals with a broad wealth of knowledge and experience in the field of environmental, health, and safety compliance.

ACS is a National Safety Council (NSC) recognized Safety Training Institute. Our OSHA Authorized Instructors conduct OSHA training courses on general safety, construction safety, general industry safety, and hazardous waste operations and are certified to teach NCS first aid/CPR training programs.

Testimonials

"I feel relieved knowing that we are safety compliant and are providing a safe workplace for our employees. On several occasions, ACS training paid off because employees remembered what to do when accidents happened. I know we saved money by taking advantage of ACS services."

Doreen Rushton, New Dana Perfumes

"It is refreshing to see this level of commitment and customer care. On behalf of our company, we commend ACS for providing us with a top-notch professional and looking out for our best interests at all times."

Vince Fiorello, FLM Graphics Corporation

"OSHA stated that they were very impressed with our company and commitment to safety and health. I attribute much of this success to our ongoing program with ACS."

Paul Harclerode, S & K

"I can recommend your company for your professionalism. All of your Account Executives are knowledgeable and dependable."

Jim Savage, Savage Kia Suzuki

"Since 1997, our overall safety issues have improved because ACS helps us keep safety awareness a priority in our business."

Holly Hager, Tyco Electronics Corporation
